Remarks and examples

stata.com

Two methods are used for specifying directions—the compass and the clock. Some options use the compass and some use the clock. For instance, the textbox option `position()` uses the compass (see [\[G-3\] textbox_options](#)), but the title option `position()` uses the clock (see [\[G-3\] title_options](#)). The reason for the difference is that some options need only the eight directions specified by the compass, whereas others need more. In any case, synonyms are provided so that you can use the clock notation in all cases.
